

# Places

## Blue Merle

Well, it looks like they're running on time  
And you can taste in my tears that I love you  
So kiss me again and then tell me goodbye  
'Cause airports ain't nothing but places you cry  
They ain't nothing but places to cry And this bartender is selling a lie  
That all of these travelers are buying  
'Cause everyone's looking for something to find  
But bars ain't nothing but places you hide  
They ain't nothing but places to hide Places do nothing but take me away from your side  
Now I'm stuck in this airport and trying to get back  
To the place that you helped me to find  
'Cause airports are places I am  
When I am not by your side This city is covered in lights  
Everyone's out for the evening  
But no one here cares if you're dead or alive  
I guess cities ain't nothing but places to fly  
They ain't nothing but places to fly Oh, places do nothing but take me away from your side  
And now I am stuck in this city and trying to get back  
To the place that you helped me to find  
'Cause cities are places I am when I am not by your side  
Yeah, places are places I am when I am not where you are Well, I dreamt that I held you tonight  
We made love in an ocean of color  
But when I awoke, you were no where in sight  
I guess dreams they ain't nothing but places inside  
They ain't nothing but places inside Oh, and places do nothing but take me from your side  
And all that I want is to try and get back  
To the place that you helped me to find  
And back to the place that I belong  
Which is right by your side
