Heave

Lifer

And you try
And you try
To get the fuck up
Listen to me
If you're scared drop to the floor
Try to think about something
Need a change 'cause everyone looks the same
Only one of us can remain
I'm not changin', no, never for you
Some people look good on their knees
But you look the best
And you try
And you try
To get the fuck up
Needed something to pass the time
Never wanted to cross the line
One step changes everything
Then everything blows
Everyone listen to me
Everyone drop to the floor
Try to think about nothing
Need a change because everything is the same
Only one chance to offend
And I'm doin' it and I'm doin' it well
Some people look good on their knees
But you look the best

And you try
You try
To get the fuck up
Needed something to pass the time
Never wanted to cross the line
One step changes everything
Then everything blows
Needed something to pass the time
Never wanted to cross the line
One step changes everything
Needed something to pass the time
Never wanted to cross the line

One step changes everything
Everything blows
Needed something to pass the time
Never wanted to cross the line
One step changes everything
Needed something to pass the time
Never wanted to cross the line
One step changes everything
Everything blows
Needed something to pass the time
Never wanted to cross the line
One step changes everything
