Falling

Staind

You in your shell
Are you waiting for someone to rescue you
From yourself
Don't be disappointed when no one comesDon't blame me you didn't get it
Don't blame me you didn't get it
Don't blame me you didn't get itI already told you that falling is easy
It's getting back up that becomes the problem, becomes the problem
If you don't believe you can find a way out
You've become the problem, become the problemYou all alone
Are you waiting for someone to make you whole?
Can't you see?
Aren't you tired of this disfunctional routine?Don't blame me you didn't get it
Don't blame me you didn't get it
Don't blame me you didn't get itI already told you that falling is easy
It's getting back up that becomes the problem, becomes the problem
If you don't believe you can find a way out
You've become the problem, become the problemI already told you that falling is easy
It's getting back up that becomes the problem, becomes the problem
If you don't believe you can find a way out
You've become the problem, become the problemFalling is easy
It's getting back up that becomes the problem, becomes the problem
And if you believe you can find a way out
Then you've solved the problem, you've solved your problem
