Saved My Life

Fee Waybill

You were just in time
I was in a slide
Doing something rash
You wouldn't have heard the splash

Playing in the street
With a bus to meet
There was not a doubt
You could've counted me out
For crying out loud
If not for your trust
All my dreams would be dust

You walked by and saved my life
I wouldn't have lasted another night
I must be doing something right
Where have you been all my life?

Took a final bow
But I'm all right now
From a curtain call
You pulled me out of my fall
My problem solved
It was probably a test
To see how much I had left

You walked by and saved my life
I wouldn't have lasted another night
I must be doing something right
Where have you been all my life?

Saved my life just in time

You walked by and saved my life
I wouldn't have lasted another night
I must be doing something right
Where have you been all my life?

You walked by and saved my life
I wouldn't have lasted another night

I must be doing something right
Where have you been all my life?

You walked by and saved my life
I wouldn't have lasted another night
I must be doing something right
Where have you been all my life?
