

# What's Your Uniform

## A Telemetry

what you wear  
could get you killed  
if your not very careful  
the wrong hat - the wrong shirt  
the wrong pair of sneakers

it matters were you go  
it matters what you show  
it happens in an instant  
the wrong colors - the wrong style  
then you go meet the reaper

in one's  
the outer-shell so important  
in my regard to you  
watch your back - watch your act

what's your uniform  
gonna do for you today  
so many games to play  
what's your uniform

what you fear  
could get you drilled  
at that all important job  
the wrong expression - the wrong grin  
the wrong attitude

compliance to conform  
to the status quo  
the right look - the right time  
the right act will make or break you

if one's bazaar  
so many doors are slammed shut  
only so far  
one will go - one should know

what's your uniform  
gonna do for you today

so many games to play  
what's your uniform

hide behind your image  
in the shadow  
you go blind from what you see  
and never realize the lie

what's your uniform  
gonna do for you today  
so many games to play  
what's your uniform

---
