

Face the Day

Great White

I don't want to face the day the day, today
Long nights leave me stranded
Black visions, danger signs
No love- I need protection
Feels like I'm on a production line
Daggers of dawn, cold hearted day
Why does it have to be morning?
Cover my head, stayin' in bed
Too late the luckless warning
Outside the screaming city
Red lights, hungry eyes
Sucks like a space invader
The vacuum of its lies
Stealin' my strength, stealin' my time
It's raining in a world of traders
Let me keep on sleeping
Forget that I'm alone
One day of faceless living-
is twenty-four hours too long
I don't want to face the day
Give me the night, it's more forgiving
Hold back the light from my eyes
Please stay invisible darkness
can't see the tears that I cry
I know it's comin', loaded with nothing
Trapped in a tunnel of time
I don't want to face the day
The day, today
