

# All I Want

702

All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me I not the kind of girl who don't know what she wants  
I see it in my mind the kind of men to treat me right  
Then only he'll be strong, he'll keep me going on  
I'll know him when he comes, he'll be my number one All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me Special in every way takes time on busy days  
To satisfy my needs says things to comfort me  
It's not much to ask for the things I want  
I'll know him when he comes, he'll be my number one All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me All that I'm looking for  
Got to have someone mature  
Ooh, everything you do and say  
You touch my heart in a special way All I want is someone All I need is some special attention  
Someone who will mention the special things in me  
All I need is some special attention  
And someone who will mention the special things in me All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me All I want is someone I can talk to  
Someone who will listen to what I have to say  
All I need is some special attention  
Someone who will mention the special things in me All I want  
All I want
