Mystery

Boxed In

Inspiration comes from the most unfamiliar places
I meet you, you are now me
Information sent now lay down your heart of aces
What will be, will just beCheck a little later and I will go
Back to the place where we went slow
Give a little help so I can see
Your mysteryComplicated sighs but in all the right directions
I look this way, and there you are
Humblest of thanks for stepping in my section
Like I said, it's not that farCheck a little later and I will go
Back to the place where we went slow
Give a little help so I can seeCheck a little later and I will go
Back to the place where we went slow
Give a little help so I can see
Your mysterySimple pleasures reach, down and underneath
Take me to your work
I'll be boy and you be girlCheck a little later and I will go
Back to the place where we went slow
Give a little help so I can seeCheck a little later and I will go
Back to the place where we went slow
Give a little help so I can see
Your mystery
