

Ain't That Bad

[N2U](#)

It's been a while ya trippin babe
How you wanna stay away
Missin you like crazy
Tell me what's the deal lady Can we ease up this pain This thing that we fought about
Ain't worth the love we talk about
We got a bond and it takes two to work it out Can't give it up no way I am made for you, you were made for
me You're soul is the most precious thing that I've held
We're connected here by faith, that's why you're my mate Can we drop this now and just let this be A perfect
man what a goal would a perfect woman hold
Such a better though to the one who loves her What I gotta do to make you smile
Cause you know I haven't seen you laughing in a while
Baby what we going through ain't that bad What I gotta do to make ya see
When I'm hurting you I'm hurting every part of me
Tell me can we back that we had
What we going through ain't bad I can role play if you learn to play a role
It's a fifty/fifty thing come on let's begin
We got behind so behind We got things to see things and places to go
So much catching up to do baby girl come on
Let's be one again What I gotta say to make you smile
Cause you know I haven't seen you laughing in a while
Baby what we going through ain't that bad And what I gotta do to make ya see
When I'm hurting you I'm hurting every part of me
Tell me can we back that we had
What we going through ain't bad Can we try to make things right
What I gotta say to make you smile
Baby tell me
Oh oh oh baby What I gotta do to make you smile
Cause you know I haven't seen you laughing in a while
Baby what we going through ain't that bad What I gotta do to make ya see
When I'm hurting you I'm hurting every part of me
Tell me can we back that we had
What we going through ain't bad What I gotta do to make you smile
Cause you know I haven't seen you laughing in a while
Baby what we going through ain't that bad
