

Goodnight. Moon

HeyHiHello!

She said it's three AM
and everybody else is fast asleep in bed
and i can't seem to find the switch to turn the lights off
even though I need to fall asleep
Signing, Goodnight moon
I'll close my eyes, okay, alright and say
Goodnight to the shadows on the wall
We we're drifting through the empty streets with weightless feet
singing goodnight to, the moon
i think you're cute when you are dreaming
all about the city lights around
and when you wake up after daybreak
so will everyone who lives in town
And they'll say, "did you see when Rocket Number Nine took to the open skies last night?"
they'll say, "it flew beyond the atmosphere and took pictures of the brilliant northern lights!"
they were singing Goodnight moon
I'll close my eyes, okay, alright and say
Goodnight to the shadows on the wall
We' were drifting through the empty streets with weightless feet
singing goodnight to the moon
Turn around, you can turn the car around girl
because there's something that's caught my eye
and I've been writing it down, girl
in case you ever said goodbye
You'll have to wait and see
when you open your eyes wide
how does it feel
after a night long car ride?
Signing, Goodnight moon
I'll close my eyes, okay, alright and say
We we're drifting through the empty streets with weightless feet
singing goodnight to, the moon
