Sleeping Beauty

Lene Lovich

Take me - make me
Mould me - fold me, shape my body
You can improve me
Rebuild a new me
Heat up or cool meBut don't forget to wake me in time
You know I had a lot on my mind
These tired old eyes await a surprise
I wonder what the future will bringFix me - mix me
Re-arrange me - change my body
Make it so pretty
They can't resist me
Queue up to kiss meBut don't forget to wake me in time
You know I got to be first in line
This sensitive child is changing her style
The ugly duck is starting to smileOpen up your eyes, you sleeping beauties must arise
You're shaping up just fine
So climb inside a brand new lifeInstrumental verseBut don't forget to wake me in time
You know I had a lot on my mind
These tired old eyes await a surprise
I wonder what the future will bringThis twilight seems like an eternity
The changes I go thru are hurting me
Do we become what we deserve to be?Open up your eyes - you sleeping beauties must arise
You're shaping up just fine
So climb inside a brand new life
