

Preludium

Eple Trio

...of the primeval priest's assum'd power
when eternal's spurn'd back his religion
and gave him a place in the north obscure
shadowly, void, solitary
Eternals, I hear your call gladly
dictate swift winged words, and fear
not to unfold your dark vision of torment
"Impia Tortorum longos his turba
furores sanguinis innocui
non satiata, aluit
Sospite nuin patria, fracto nuin funeris antro,
mors ubi dira fuit vita salusque tenent"
