Sand Dance

Temples

From under night sky we will wait hoping
That our reflection meets between two
Below the dark cries secretly laughing
A smile was passed but never on youCome into the meaning when the light sold our
Secrets left us in turn
Circle in the desert where the mind grows now
In a sand dance we burnUpon a question answers prevail
A vivid memory of which shes unsure
A lesser meaning left among feelings
A pirouette left down on the groundCome into the meaning when the light sold our
Secrets left us in turn
Circle in the desert where the mind grows now
In a sand dance we burnGuide the light to
Sinking from view
We have to beWhat we have to learn
We have to see
Things that we wish could beFlames between you
Burning from view
We have to be
What we have to learn
We have to see
Things that we wish could beStill under night sky
We will wait hoping
That our reflection meets between two
Below the dark cries
Secret in passing
A smile will last but never on youGuide the light to
Sinking from view
We have to be
What we have to learn
We have to see
Things that we wish could beFlames between you
Burning from view
We have to be
What we have to learn
We have to see
Things that we wish could be
