

I Want to Go with You

Eddy Arnold

I want to go with you
To that another world
The one your love takes me to
I want to go with you I wish I were glass
So you could see through
Then you'd know before you ask
That I want to go with you I want to go with you
To that another world
The one your love takes me to
I want to go with you You take me away
To a world I never knew
What else can say?
I want to go with you
