

I've Got Something Better

[Lisa Stansfield](#)

You've got somethin' on your mind
But I've got somethin' better
Come closer, much closer, kiss and confide
One taste and be sure you'll find sugar inside
I feel your caress
I'm undressed by your eyes
There'll be no inhibition tonight
Open up, show me love, turn up the music
Tear me up, turn me on
We got the bomb, baby, let's use it
Open up, show show love, turn up the music
Tear me up, turn me on
We got the bomb
Baby, close your eyes, take your time, relax awhile
'Cus know when you do it, boy, you do it to the better
Stop wasting precious time imagining what we can do
You've got somethin' on your mind
But I've got somethin' better
You've got somethin' on your mind
But I've got somethin' better
Take what you're thinking and times it by ten
Now you know where you're coming from, let it begin
Tell me your fantasies, I'll show you mine
There'll be no inhibition tonight
Open up, show me love, turn up the music
Tear me up, turn me on
We got the bomb, baby, let's use it
Open up, show, show love, turn up the music
Tear me up, turn me on
We got the bomb
Baby, close your eyes, take your time, relax awhile
'Cus know when you do it, boy, you do it to the better
Stop wasting precious time imagining what we can do
You've got somethin' on your mind
But I've got somethin' better
You've got somethin' on your mind
But I've got somethin' better
