One More Song

BullGooseLoony

Miss your smile, miss the moments
We were wild, we will always be
In my heart, couldn't hold it
When you left, you took the melody
It's not our choice but it still feels wrong
Without your voice, it's just not a song
It's just not a song
'Cause you make it real and it gets hard to feel
If you can only come back, come back
I would give anything just want to hear you sing
If you can only come back, come back
For one more song, for one more song
You're our friend and you'll always be
And your place are forever keep
When I'm down, I look up to the sky
So you can lift me up, you can lift me up
It's not our choice, it still feels wrong
But it feels so wrong,, without you
Without your voice it's just not a song
It's just not a song
'Cause you make it real and it gets hard to feel
If you can only come back, come back
I would give anything just want to hear you sing
If you can only come back, come back
To fill my heart again with only music you can
'Cause I will never be the same without your heart
Without your love, without your soul
'Cause you make it real and it gets hard to feel
If you can only come back
'Cause you make it real and it gets hard to feel
If you can only come back, come back
I would give anything just want to hear you sing
If you can only come back, come back
For one more song, come back
For one more song, come back
For one more song, come back
For one more song, yeah, yeah
I miss my friend, I miss his melody
Come back, I miss my friend, miss him now

Come back, miss my friend, miss his melody
