

It's All Good

[Toby Keith](#)

Mother earth has changed since I was a child
The east is a beast and the west is really wild
And the headlines say that end looks grim
And the future don't look so bright
You can't even open your mailbox, you can't take a plane
And everybody's lookin' for somebody to blame
I think I'm gonna let the president, save this old world tonight
I'll light us a fire and she'll turn off the news
We'll open a cold one and shake these blues
It's all good, it's alright, I'm gonna sit here with my baby all night
And let the troubles of this world, roll on by us like they should
It's all cool, it's okay, we've got everything going our way
Can't complain if we're alright, it's all good
I'm just a regular Joe, with a beautiful girl
Just gettin' by in a day to day world
We ain't got a lot, but we don't need anything
Covered in kisses, surrounded by love
Showered with blessings from up above
When you're sittin' on top of the world, man you got everything
We live out here in the country, where the workin' class do
We've got our health and our happiness too
It's all good, it's alright, I'm gonna sit here with my baby all night
And let the troubles of this world, roll on by us like they should
It's all cool, it's okay, we've got everything going our way
Can't complain if we're alright, it's all good
No, can't complain 'cause we're alright and it's all good
