

Body and Soul

Anita Baker

What have you done to me?
I can't eat, I cannot sleep
And I'm not the same anymore, no no I don't know what to do
'Cause all of me wants all of you
Do I stand alone at the shore? Now once I could turn away
From everything I feel today
But now I wanna walk through your door And I've got to know, know, body and soul
That you've got no doubt inside and out
We are whole, whole, body and soul
Don't leave me out in the cold
Just love me body and soul, body and soul, soul
(Do you hear me, baby?) I've wasted too much time
Living for what wasn't mine
And then came the day I found you And now I want nothing less
I've found a love that is truly blessed
And I want to make dreams come true But I've got to know, know, body and soul
That you've got no doubt inside and out
We are whole, whole, body and soul
Don't leave me out in the cold
Just love me body and soul Every day is getting better
The more I trust I feel stronger and stronger
Every kiss brings me closer
It feels good to love you inside, yeah, yes
(I've got to know, oh)
Is there any doubt in your mind, oh yeah (We are whole, whole)
Hold me, baby, hold, hold body and soul
Don't leave me out in the cold
Just love me, hey, love me, hit your body, baby
(We are whole, whole)
Is there any doubt in your mind? (We are whole, whole)
Tell me baby, tell me darlin', call my soul
Just love me but I never knew love
Just love me, body and and soul Body and soul, soul
Body and soul, soul
Body and soul, soul
Body and soul, soul
Body and soul, soul
