Come Again

Thornley

As a child I found myself alone
Always walking in defense
Here they come again
All I want to do was just get home
But I'm pinned to the fence
But here they come again
I walked home all alone
All this and more
All this and more
I guess this is living
Would you come again?
Could you come again?
I never quite feel right
But I come again
Would you come again?
Yes, I've become a rock and roll cliche
Because I 'm looking for revenge
And here they come again
I still walk home alone
All this and more
All this and more
I guess this is living
Would you come again?
Could you come again?
I never quite feel right
But I come again
Would you come again?
All this and more
All this and more
I guess this is living
Would you come again?
Could you come again?
I never quite feel right
But I come again
Could you come again?
I guess this is living
Would you come again?
Could you come again?
You never quite feel right

But you come again
Would you come again?
