

Take It Higher

Larry Greene

When I watch you walk away
I can hear the words you say
In another time and place
Just a renegadeCause it's something that you knew
Make it right-make it true
Know you got to break on through
There's only one thing you can doTake it higher
Fight with fire
Take it higher
Over the topI can see it on your face
Lightnin' strikes without a trace
Anyway there's many days
That you know it's okNever let it get you down
You got to give in to the sound
There is so much to be found
Now than we are glory boundTake it higher
Fight with fire
Take it higher
Over the topWalk into a world
Inside another universe
Somewhere that you always want to go
Spinning like a circle
With the meaning of the words
Be careful or you fall like dominoesWhen I watch you walk away
I can hear the words you say
In another time and place
Just a renegadeCause it's something that you knew
Make it right-make it true
You know you got to break on through
Only one thing you can doTake it higher
