

# Sleep Well Tonight

## Fightstar

Sleep well, tonight  
I'll wake you at the first sign of light  
If you just make sure  
You sleep tonight Take care, stay with us  
All you've seen has gone  
If you dream the truth  
It will all come clear Pull me up just to make a stand If you could take a lifetime away  
And make me come back down  
If you could take the hours then  
Maybe we could fall apart  
I could stay the same Sleep well, tonight  
I'll wake you at the first sign of light  
If you just make sure  
You sleep tonight We fell like everyone else has our mark  
Will show where we were for our last time  
We'll carve the marks to remember this If we could take a lifetime away  
And make us come back down  
If you could take the hours then  
Maybe we could fall apart  
I could stay here Sleep well, tonight  
Sleep well, tonight  
Sleep well, tonight If we could take away the summit  
We could climb the highest we've ever been to  
If we could take away the summit  
If we could take away the summit  
If we could take away the summit
