

Multiply and Divide

The Soviettes

Put the keys to the car
then they'll know that someone sits inside
Put a flag on the back
and they'll see you've got all American pride
Keep your eyes on the ground
chemicals,gonna keep you from those lies
Now you're part of the band
that they've got get your peas in a pod and you'll
multiply and divideWill someone when you're sparkling take a right
belt rub them in the right way?Go!Everybody says when you lose control
this time they'll never wanna fight 'emGo!Fuel to the fire I fear sometime
on the pills and these hearts expireGoI take a shortcut So I end up with too much
D-I-V-I-D-EStop!Get your head around me
you've got to think about itLook!at what's going on around youLearn!How to think things through
and things that you can do toFight!They'll divide and multiplyPut the keys to the house
at the end of the circle then you'll see
that just drop to the plan
but you know it makes everybody free
Get up back to the wall to control
who you'll talk to who you'll see
You'll be American dream
how's it feel have you got what you want
and you'll multiply and divideGo!Straight to the point
and you're lending your voice
pretending you're standing up
for what is rightGoDivision on the A.M. multiply
F.M. give it to the best one yetGoand never what you want
and never what you get
and straight to the point to the best oneGoI'm taking chopped nuts and remember that's
too much D-I-V-I-D-EWell now that's not exact but the point
is that rockers know the thieves
keep hopping the bridge
but It's not gonna get us what we need
Now they're waiting in streets
cause what else can we do
to make them see
No insurance no pill
not the part of the plan
that you've got that'll multiply and dividemultiply and divide

(That's right)multiply and divide
(multiply and divide)multiply and divide
(That's right)Multiply and divide
(yeah)Stop!Get your head around me
you've got to think about itLook!at what's going on around youLearn!How to think things through
and things that you can do toFight!They'll divide and multiply
