I Want You Near Me

Tina Turner

Should you stay? Should you go?
You're beggining to see
I blow hot, I blow cold
It's just the devil in meYou've got to understand
I am in love with a beautiful man
So if you're feeling insecure
You've really no cause to beI want you near me, don't you turn away
Just got used to having you around
I want you near me, come on here and stay
Don't let me downYou're so good with your hands
To help me with a hook or a zip
Indispensable, that's what you are
For the occasional kissI'm only playing games with you
I can't be nice without being cruel
I know it's not fair
But I make the rulesI want you near me, don't you run away
Just got used to having you around
I want you near me, come on here and stay
Don't let me down, don't let me downI want you near me, babyAll I want, I've decided
Is your attention undivided?
I want you near me, don't turn away
I want you near me, won't you stay?I want you near me, don't you run away
I just got used to having you around
I want you near me, come on here and stay
Don't let me down, don't let me downI want you near me, baby
Don't you turn away
I want you near me, baby
Come on and stay
I want you near me, baby
