Nicely Played

Greg Laswell

I'll add it up again
But something is missing
To many times around
It's making me dizzy
Gotta figure out a way to get past this someday
But for now it stays

Rope in only those that can pull you up
Cut loose the ones just beneath you
Nicely played

While you save your face
While you justify
Your subtractive place
And tag the wings that pass through your sky

On your way up
I'll try to forget it happened
On your way down
You'll try to forget it happened

The folks blowing up your head
I think you believe it
I tried all awhile
But I couldn't take it
Gotta figure out a way to get past this someday
But for now it stays

Rope in only those that can pull you up
Cut loose the ones just beneath you
Nicely played

While you save your face
While you justify
Your subtractive place
And tag the wings that pass through your sky

On your way up
I'll try to forget it happened
On your way down

You'll try to forget it happened

On your way up
I'll try to forget it happened
On your way down
You'll try to forget it happened

While you save your face
While you justify
Your subtractive place
And tag the wings that pass through your sky

On your way up
I'll try to forget it happened
On your way down
You'll try to forget it happened

On your way up
I'll try to forget it happened
On your way down
You'll try to forget it happened

On your way down
On your way down
On your way down
On your way down
