Hard for Days

SomeKindaWonderful

I'm addicted to your blinding resolution
I come running when them other men run away
I'm addicted to your body's evolution
I be gunning when them others put the gun awayGun is bashing to a force of nature
Rising like the moon and so I just can't stopShe give me hard for days
Hard for days
She give me hard for days
With her awful ways
I can operateI'm addicted to your mind and all your movements
Like you're coming through a shock, all I could say
I'm addicted to your love, it's superhuman
Your permission's my admission, just admit it, babeGun is bashing to a force of nature
Rising like the moon and so I just can't stopShe give me hard for days
Hard for days
She give me hard for days
With her awful ways
I cam operateThrough my extension calculate affirmation
Create life and travel to other dimensions
I'm not born for patience, I work with your hesitation
We can spark a confrontation that will trump any conversationShe give me hard for days
Hard for days
She give me hard for days
With her awful ways
I can operate
