

# As We Speak

## Soilwork

As we speak, the stable table turns  
As we speak, I should have known we're burned  
With the guess, I'll never, never learn  
Which of those faces who makes it all turn  
As we speak I'm going deeper down  
As we speak with a terrible sound  
A feeble holy bastard son  
Has it only just begun? I turn away  
(Fadin' out alone)  
Was a lifetime worth it all?  
Fadin' out  
(Fadin' out alone)  
As we speak we turn to stone  
(As we speak we turn to stone) As we speak, a young man loses his mind  
As we speak, he kills what's next in line  
A broken down mother asks herself why  
Is this the end of her precious time?  
As we speak, a conscience leaves without a trace  
A silent departure to a silent place  
What do we know about the anger that starts to grow? (Don't despair)  
Time will heal your torment  
(Don't you dare)  
Spend your days in hell  
(So beware)  
Faith will bring you treason  
(While you stare, oh)
