

KKKill the Fetus

Esham

Why did you wake up in the life, in this world we livin'
Love ain't worth a dime, so then you nothin' to give him
The baby has no father, he ran out on the mother
So raise him as cannibal to be like Jeffrey Dahmer You life is really worthless, you live and then you die
You go to die and bodies rot and then your wonder why
And then you live in doubt, till you live or live without
The facts you know, you can't afford to feed another mouth Your head is steady spinnin', the Devil's steady
grinnin'
While you was steady sinnin' from the very first beginnin'
Is it a boy or girl, I think I should referral
You should terminate it, because it's a lousy world You life on the line, you're out ya fuckin' mind
You gotta to your tape, 'cuz you're runnin' outta time
It's just another embryo, attached to an umbilical
You can let that baby grow but I'd kill it though
Kkkill the fetus, kkkill the fetus The bodies premature, the mother is a whore
Contemlatin' suicide so what you waitin' for
I think I heard a splinter, but that's a normal state
Gem a hang over ya asshole until your water brake You better use some caution, yeah, they used up an abortion
Death the only way to solve a suicide solution
So here's my contribution, my suicide solution
You play the game of death but then you can't win for losin' You want it and you got this, on shit you killed the
fetus
Live is just a waste, so then you outta just delete this
Problem to society, society's a problem
My suicide solution is a 38 revolver I'm your problem solver, your life is full of horror
Some are born to die and some are die tomorrow
Vagina tissue's dorm, your pussy's kinda worn
I flipped out on a warn, if you haven't none to born Your inner one perspective, there is one concesept
Your M.P.D. is positive, so you can let that baby live
It's just another embryo, attached to an umbilical
You can let that baby grow but I'd kill it though
Kkkill the fetus, kkkill the fetus The planet's really fucked, so know ya kinda stuck
You should of thought about it, before you bust a nut
It is a lousy world, I live a lousy life
I think I outta stab ya, wit' the sunkin', wit' the knife Or push you down a flight of steps until you fall and break
ya neck
Did a little damage, can you manage on this carriage
Life is not a choice, death is the alternative
Or shit you let it grow up in this fucked up world that we live in These are the consequences, add one more to

the State Census

Born to die in poverty, so tell me what's the census
It's just another embryo, attached to an umbilical
You can let that baby grow but I'd kill it though
Kkkill the fetus, kkill the fetus
