

Foreign Exchange Student

Xv

Yeah..

We're on Squarian yet?

(laughter)

(Verse 1)

What planet did you come from?

With your nails, make-up and hair done

At My show, Hands up to the sun

Ask her what she's doing when it's done.

We're gonna kick it, have a little fun

Play me a in street fighter four and one

Chun Li kicks

Hair in a bun, marvel sweats, all-star chucks

What you smoke, what you drink

Bring TaiKoo? what you think

Bra all black. Panties pink

I'ma see that by the end of the week

We take it slow. I'll Take you home

Your moms dont trip, cause shit you grown

She said "you're gonna let me sleep alone"

I said "nah", she said "come on"

chorus:

I don't know just where you came from

But I need you now

If you leave me for the stars, that's something I would never allow

Yeah see, i knew she wasn't from here

That's why i called her foreign exchange student

She's like fresh as fuck, Louie Vutton, Alexander Wayne, all that

But at the same time she plays Marvel vs. CapCom 3,

Listens to the Pixies religiously,

and had like a 16 Kill streak on Black Ops.

I don't know your circle (circle)

but you like this Square right here

i know your Ex hurt you (hurt you)

but don't be scared, (be scared)

I'll take you high,(so high)

Up in the air, (the air)

George clooney cool, and I dont Bugs thats Looney Tunes

You come back stage my Crew, it's cool

Mass effect 2 And watch Kung Fu
Grabbing these snacks like Scooby-Doo
Smoke to your eyes like Lucy Lou
She knows I ball. She asks for the shots
Hit a triple double, when I pass the Ciroc
If Love is Blind, then I'm at Merc Dock
You ain't going home i'm glad you not...Cause
(Chorus)

I don't know just where you came from
But i need you now
If you leave me for the stars
Thats something I'll never allow
For all the ladies, or should i say Squarian women out there
That this applies to,
I wish i could send you some beautiful flowers
Or teddy bears, or something
But i can't
So I'm gonna have Awesome Sound play the Sin Solo
Just for you baby, just for you
Check it out
Is that vintage? Preferably.
Swag Swag Swag, Swag
Yeah!
(Chorus)

I don't know just where you came from
But i need you now
If you leave me for the stars
Thats something I'll never allow
