

A to Z

Vincent Liou

Our warm bodies will last for eons
Stardust is all that we are I can see past the golden willows
One day our names will be written among the stars Would you stay from A to Z?
I promise you're the only one for me
The moon looks beautiful, doesn't it? Could you spare me from a lifetime
Without your love
Where would we be? I can see past the golden willows
One day our names will be written among the stars Would you stay from A to Z?
I promise you're the only one for me
The moon looks beautiful, doesn't it? Would you stay from A to Z?
I promise you're the only one for me
The moon looks beautiful, doesn't it?
