

And Then You Went Away

Brian Vander Ark

I've been living in here long enough
It reminds me of when times were tough
And I still think about you everyday
It's like you never really went awayThere were no signs
There were no warnings
Saying that it's over
All you left behind was everythingYou hung your favorite picture
So you could see it everyday
Then you went away
And then you went awayIt's by the window garden
You said you'd water everyday
Then you went away
And then you went awayIt's been awhile and I feel alright
You can call me day or night
'Cause I don't think about you anymore
In fact some of your things went out the doorThe only words that
Make me feel better
Are saying that it's over
All you left behind was everythingSlipped down the velvet curtains
The one's that you had custom made
Then you went away
And then you went awayAnd there's my new best friend
The one you took in as a stray
Then you went away
And then you went awayI guess it's not over yet
'Cause when I'm ready to forget
I remember where I am'Cause there's a photograph
That you put up on display
Then you went away
And then you went awayAnd there's a box of letters
That had me thinking you would stay
Then you went away
And then you went awayAnd there's a coffee table
You said would not be in the way
Then you went away
And then you went awayAnd in the window garden
The leaves are falling in decay
Since you went away
And then you went away
