

Float

KT Tunstall

I'm gonna fall
Head first and fast like an avalanche
Maybe I'll land, maybe I'll crash
I'll take the chance Cause there's nothing but
Air in between me and everything
Nothing to keep me from flying aimlessly
Shamelessly laughing at destiny And no one knows how high I go
Or what makes the atmosphere glow
I could follow the narrow road
Or maybe I'll let it all go And just float...I'm gonna live
Headstrong and wild like a golden child.
All of the while
I'll be taking each breath with a mile-wide smile Cause there's nothing but ground below
Why should I take it slow?
Status quo isn't so great and I know
I can light up the sky like a thunderbolt And no one knows how high I go
Or what makes the atmosphere glow
I could follow the narrow road
But maybe I'll let it all go And just float...I'll float, float...No one knows how high I go
Or what makes the atmosphere glow
I could follow the narrow road
But maybe I'll let it all go And just float...I'll float, float...
