I Almost Never Loved You

Jeff Carson

Any other mornin', you might have walked a different street
Turned a different corner instead of bumpin' into me
You'd have never said, "Excuse me"
I'd have never smiled and told you, "That's okay"We never would have sat down in that quiet coffee shop
Traded old war stories about loves that we have lost
I'd have never got your number
Before I kissed your cheek and walked away
We wouldn't be here todayOh, I almost never loved you
Another place, another time
I'd have missed your kiss forever
And watched you walk on byI'd have gotten up this morning
Just another lonely fool
I could never live without you
And yet I almost never loved youNow, a man like me, I might as well admit it
Lovin' you was easy, the trick was fallin' in it
All the what-ifs and near misses
The stars that had to line up perfectly
It scares me now to thinkOh, I almost never loved you
Another place another time
I'd have missed your kiss forever
And watched you walk on byI'd have gotten up this morning
Just another lonely fool
I can never live without you
Yet, I almost never loved youRight out of the blue
Right into a dream
Fate must have smiled on meOh, I almost never loved you
Another place another time
I'd have missed your kiss forever
And watched you walk on byI'd have gotten up this morning
Just another lonely fool
I could never live without you
Yet, I almost never loved you
Oh, I almost never loved you
