Take Pills

Inspired And The Sleep

Surely there is
No substitute for company
My mom's ripping off her hands
One flake at a time
All her children left the house
And left her all alone
But just like she'd tell me
Things get better
Just wait and you'll see
Take one day at a time
Everything else you can leave behind
Only one thing at a time
Anything more really hurts your mind
I don't want for us to take pills anymore
Not that it's bad
I don't want for us to take pills
Because we're stronger
And we don't need them
