I'm Better

Irontom

Hey, tell me what's going on?
Hey, tell me where I go wrong?
I've been losing all I got
Then you, you just walk right in
You just walk right in
When I'm here with you
I just block it out
It's cool we talk about whatever
And yeah, you know I've been around
My world came crashing down
But when I'm here with you, I'm better
Hey, I'm watching the worlds collide
Hey, there's nobody else inside
Girls they don't know what they want
But you, you just walk right in
You just walk right in
When I'm here with you
I just block it out
It's cool we talk about whatever
And yeah, you know I've been around
My world came crashing down
But when I'm here with you, I'm better
Used to be that I just had to fake it
All my life
Over and over I just couldn't take it
Not this time
But you, wherever you walk, I'll run
Yeah you, anything goes tonight
When I'm here with you
I just block it out
It's cool we talk about whatever
And yeah, you know I've been around
My world came crashing down
But when I'm here with you, I'm better
When I'm here with you
I just block it out
It's cool we talk about whatever
And yeah, you know I've been around
My world came crashing down

But when I'm here with you, I'm better
