

# Tidal Wave

## Longwave

Take me down in a tidal wave  
Take me down when I'm wired  
The hardest thing you ever gave away  
Is the hardest thing to keep I am everything you wanted  
I am everything you wanted  
I am everything you need Take me back to the other place  
Take me back when I'm alone  
I can see all the little things  
That once could make me whole I am everything you wanted  
I am everything you wanted  
I am everything you need But I can feel it again  
I can feel it again I am everything you wanted  
I am everything you need Give me the colors of a different light  
Give me the colors gray and blue  
Everything you ever hoped to be  
Is when the colors bleed I am everything you wanted  
I am everything you wanted  
I am everything you need But I can feel it again  
I can feel it again I am everything you wanted  
I am everything you wanted  
I am everything you wanted Everything you wanted  
Everything you wanted  
Everything you wanted
