Something About Us

Daft Punk(ë‹¤í”„íŠ¸ íŽ‘í•¬)

I bet you think we don't know
How to be a part of this game
We don't wanna talk about the reason what is true
We are not the same
I bet you think what we have
Is like a picture in the frame
Baby, don't worry and remember
Why people know our name?
Try to figure out, is it real, is it show
I don't wanna hear this nasty stuff
'Cause you don't know the things I know
Don't ask me what it's all about, you've gotta understand
We do the things we wanna do
We've chosen to eternity
As real as we can
If something about us, it's straight from the heart
We belong together right from the start
Destiny told us there is no doubt
Respect is what it's all about
I bet you think we don't know
What we have got to do
'Cause everytime we come around you act like
We don't have a clue
And I bet you think we still care
If you will like us too
But we are through, yeah
Try to figure out, is it real, is it show
I don't wanna hear this nasty stuff
'Cause you don't know the things I know
Don't ask me what it's all about, you've gotta understand
We do the things we wanna do
We've chosen to eternity
As real as we can
If something about us, it's straight from the heart
We belong together right from the start
Destiny told us there is no doubt
Respect is what it's all about
There's something about us, you can't explain
The only thing we're here for is to entertain

Destiny told us not to run away
We will make it anyway
God, please save us
We are just 5 angels, we are puppets on a string
God, please help us
We don't earn any money
Something about us
This is coming from my heart
We belong together right from the start
Destiny told us there should be no doubt
Something about us
It's something that you can't explain
All we want to do is to entertain
Respect is what it's all about
There's something about us you can't explain
The only thing we're here for is to entertain
Destiny told us not to run away
We will make it anyway
