

In My Head

We Are Scientists

I never know if i'm awake
Your present going out of date, in my brain
The next move isn't mine to make
So how much longer are you gonna wait?Though I want it
I can't tell what you're doing in my head
When you're running
I can't tell what you're doing in my headI don't expect you'll understand
The question isn't if but when we began?
What happens will be on your hands
Whatever happens is on your handsThough I want it
I can't tell what you're doing in my head
When you're running
I can't tell what you're doing in my headAnother.....
I need some control in this
I'm most suggestive of lines i'm in?Though I want it
I can't tell what you're doing in my head
When you're running
I can't tell what you're doing in my headIn my head, In my head
