

# Devils

## Bullet Treatment

Who told you about a man without fear?  
Who told you about a God who does not care?  
Who told you about a pain that does not hurt?  
Who told you about a love that turns to dirt?

Devils

You've got a face to face with your devils  
You've got a race to race with your devils  
You've got to find a place among your devils  
You cannot replace your devils

Devils

Who told you about cause and effect?  
Who told you about a heart that can forget?  
Who told you about fortune and fame?  
Who told you that the evil has got no name?

Devils

You've got a face to face with your devils  
You've got a race to race with your devils  
You've got to find a place among your devils  
You cannot replace your devils, you can't deny devils

They'll get you in the night

Who told you?

Who told you?

Devils

You've got a face to face with your devils  
You've got a race to race with your devils  
You've got to find a place among your devils  
You cannot replace your devils, you can't deny devils

They'll get you in the night, devils

Devils, devils
