

Position

Hot Water Music

prepare yourself for the moments of the breakdowns of the questions this is what keeps us going down so don't
let it push us inside this is what i despise is that treason since my days i've learned some certain ways to keep
away from certain ways it's what i've learned it's what i've made sometimes i am put down but i'm sure to
stand up like a champion like a soldier with strong will sure i think like anyone about what is about to come but
what is the point in dwelling when we all could be sharing this is what i've learned and made and i won't back
down from my right of standing or from my choice of position
