

My Infinite Love

[George Strait](#)

When you see me shooting star in the night
When you hear the warm wind whisper through the pines I want you to know
It'll be me and my infinite love for you
It's just like I promised you under heaven above
It will live on long after we kiss goodbye
Forever by your side, my infinite love When you think someone is callin' out your name
When you feel that kind of feelin' you can't explain Now you will know
It'll be me and my infinite love for you
It's just like I promised you under heaven above
It will live on long after we kiss goodbye
Forever by your side, my infinite love I want you to know
It'll be me and my infinite love for you
It's just like I promised you under heaven above
It will live on long after we kiss goodbye
Forever by your side, my infinite love My infinite love, my infinite love
