

I'm a Star

StoryBots

I'm a star,I'm a star,I'm a star,I'm a star,I'm a star,I'm a star,I'm a big big star,I'm a star from a far,yes you are,so am I,we are balls of hot gas that shine in the sky,there are drillions and drillions of us,that's a lot,even the sun is a star....I'm so hot,there are lots of other stars,like him, and me, and me,and a bunch of us together form a gal-axy ,there's billions of galaxies,lots of stars,understand,there are more stars in space than all of earth's grain some sand,look from land with your eye to the night sky display you can see the earth's galaxy,the milky way!Stars are different sizes,and we can morph,there are super giants,giants,main sequence,and dwarfs,and we form constellations,which are patterns of stars,before GPS to let you know where you are,we're the big dipper,we're the belt of a right,we're the dramano's wheel,we're Leo the lion!People think we twinkle but that's not true,the light's just playing tricks when it shines on you!And shooting stars aren't stars,no they're not,they're meteors burning up when they get too hot,wish upon a star,mine come true,no I hope,look up in the night sky or look through a telescope!
