Get Over It

Start Trouble

If someone ever needed to leave it all, it'd be you
And as a matter of fact you do
Put the poison in your head when you wake up out of bed
'Cause you live in a nightmare, I careToo much to see you go down like this
You're the person that I really thought I'd never miss
Out of touch, out of mind and I'm waitin' for you
So be there, I'll be fair, I'll be real with youMove along, stay strong, get over it, get on with your life
Move along, stay strong, get over it, get on with your lifeAnd when you reach for me, you start feelin' sober
And when you need to believe, it's almost overEvery day is the same routine
Feelin' sorry for yourself 'cause of broken dreams
The more I think about it, the more it makes me sick
In the back of my head I'm screamin', "Get over it"Do you wanna run away and never change?
Do you wanna stay locked in your fuckin' cage?
Out of touch, out of mind and I'm waitin' for you
So be there, I'll be fair, I'll be real with youMove along, stay strong, get over it, get on with your life
Move along, stay strong, get over it, get on with your lifeSome people never change, some people never change
Some people never change their lives
And I'm waiting for you, waiting for you
I'm waiting for youMove along, stay strong, get over it, get on with your life
Move along, stay strong, get over it, get on with your lifeAnd when you reach for me you start feelin' sober
And when you need to believe it's almost over
