Let's Go Away

Ace Troubleshooter

This view has got to change
So let's skip town
Let's go away
Who knows where?Let's quit our jobs today
What would we do?
Where would we stay?
I don't careWe're young and so in love
We'll be together, so let's go, let's go away
We're young and so in love
We'll be together, come what may, let's go awaySo let's just go tonight
Just you and me
We'll be alright
Have some funReady for me to say
Let's go to California ye
In the sun, yeah, yeahWe're young and so in love
We'll be together, so let's go, let's go away
We're young and so in love
We'll be together, come what may, let's go awayDarling, darling, let's go
We'll feel the wind on our face
Darling, darling, I know, I feel it too
So let's storm the castles
And all the places we never knew
Just as long as you're there with meWe're young and so in love
We'll be together, so let's go, let's go away
We're young and so in love
We'll be together, come what may, let's go awayWe're young and so in love
We'll be together, so let's go, let's go away
We're young and so in love
We'll be together, come what may, let's go away
