Into My Arms

Outformation

One night one night is never enough with you
Please come back into my arms
So we can hold and share what we had before
Everythin is the same only you're not around

The silent chill and the smell you made
Is making me nervous and I'm always sad
How much more of this is there to come?
Don't let me know

One night one night is never enough with you
Please come back into my arms
So we can hold and share what we had before
We found him lying here staring at the stones

Seem like he'd made up his mind after all
I'd like to save him take his mind off the pain
But you and i both know that I've gont things to do
One night one night together again just won't do

When there's so much more to give
So won't you come back here now into my arms
