

You

Dokken

D. Dokken/J. Norum/K. Keeling

Life as dreams

Streets of gold

You used to go there

Now you're draining down the bottle

Systems failing

Sirens wailing

It's no secret that you're headed for the farm child

It's time you're leaving

Take a break down to the shore

You used to love it where the Holy waters flow

Maybe you'll find your long lost message in a bottle

Sent long ago

To your self long ago

What are you looking for?

The line is long

You're too far out

No hidden meanings here

But I have to spell it out

Sleep in late

Or never wake

Missin'g such a good time

Thinking that you're never gonna throw it all away

They found your message on the other side of life

But they don't want you over

They don't wanna cry

Seems that you've gone too far caught up in your self

Better find your way out

It's not all about "YOU"

BRIDGE

Into the light of the sun

Now you're gone

Send me a word out of faith

You'll be home

Far away

You make believe before you go to sleep

That life is going your way

The things you need are superficial indeed

And leading you astray - far away

Chorus

Its time you're leaving take a breakdown to the shore

You used to love it when the Holy Waters flowed

Maybe you'll find your long lost message in a bottle

Sent long ago

Is it just all about you?
