

# Make My Day

## Synthesis

Woke up late  
World won't wait  
So I make my way downstairs  
    Mom freaks out  
    Please don't shout  
    I still have to dry my hair  
    I've been up all night  
    Just thinking you're the one  
        Who's in my dreams  
My heart just keeps on jumping  
When I think what we could be  
    Just go ahead and make my day  
You make the world just melt away  
When things go wrong and skies are gray  
    Just make my day, make my day  
        Second bell  
        Show and tell  
        At my locker down the hall  
        Heart in throat  
        See your note  
        And it turns out after all  
        You've been up all night  
        Just thinking I'm the one  
  
        Who's in your dreams  
Your heart just keeps on thumping  
When you think what we could be  
    Just go ahead and make my day  
You make the world just melt away  
When things go wrong and skies are gray  
    You just make my day, make my day  
        We're holding hands  
        We're walking home  
        We don't know what to say  
            But later on  
            I read your text  
            You made my day  
            Here we go! Ha!  
        Just go ahead and make my day

You make the world just melt away  
When things go wrong and skies are gray  
    You just make my day  
    Just go ahead and make my day  
    You make the world just melt away  
When things go wrong and skies are gray  
    You just make my day, make my day  
    You just make my day
