Got Your Name On It

Feel

When the air comes in at night
It almost seems to call out your name
When its dark out, when its light
The seasons change but your love remainsAnd theres a blue sky
Got your name on it, got your name on it
And when the sun shines
Got your name on it, got your name on itEven this heart of mine
Got your name on it, got your name on it
So, I never will forget youWhen the leaves fall past my knees
Reminds me that I cant live without you
Something you are changes me
Into something I wanna beAnd theres a blue sky
Got your name on it, got your name on it
And when the sun shines
Got your name on it, got your name on itEven this heart of mine
Got your name on it, got your name on it
So, I never will forget youNever could remember names
Always seem to forget a face
But if my memory of you should fade
All I gotta do is look upAnd theres a blue sky
Got your name on it, got your name on it
And when the sun shines
Got your name on it, got your name on itEven this heart of mine
Got your name on it, got your name on it
So, I never will forget you
