

Young Love

Teena Marie

Ooh, ooh, yeah, yeah I remember back in school, when I first laid my eyes on you
I saw your smile and knew right then and there
You reached out and touched my hand, two became just one person
No one could have stopped our love affair But lately we can't even see each other, no
Without acting just like distant lovers
We've even took to fighting, under covers
What a shame, baby, who's to blame Young love, why you wanna grow old on me now?
Young love, why you wanna grow old on me now?
Don't say goodbye my love, no, no, no, baby
Just one more try, young love I remember promises, the way I'd feel when we'd caress
I can't imagine where young love went wrong
You said that you needed me but where is the sincerity
I, I guess that with our love that too has flown 'Cause lately we can't even touch each other
Without acting just like distant lovers
We've even took to fighting, under covers
What a shame, baby, who's to blame Young love, why you wanna grow old on me now?
Young love, why you wanna grow old on me now?
Don't say goodbye my love, no, no, no baby
Just one more try, young love Do you remember the young love
Do you remember the love we shared
Do you remember the young love
Do you remember the love we shared
(When love was new, baby) Do you remember the young love
Do you remember the love we shared
(And we were to sugar)
Do you remember the young love
Do you remember the love we shared
(When love was new, baby) Do you remember the young love
Do you remember the love we shared
(And we were to sugar)
Do you remember the young love
Do you remember the love we shared
(Listen to me) Don't you think we ought to give it one more try
We've come too far to be saying goodbye Oh, I'll give it on more try, oh, don't you remember, baby
Young love was much better, oh, my love (Young love)
Why you wanna grow old on me?
(Young love)
Why you wanna keep me in misery
(Young love)

Why you wanna say goodbye
Why you want to make me cry, baby
(Young love)
Young love, my love, your love Why you wanna say goodbye
(Young love)
Why you want to make me cry, baby
(Young love)
I'm cryin', baby, I'm cryin', baby
I'm cryin', young love, I'm cryin', young love
(Young love)
I'm cryin', young love, I'm cryin', young love
(Young love) Don't say goodbye, please
