## **High Above**

## **Lucy Schwartz**

Sitting watching the waves roll back and forth And everything is beautiful, for a moment Sitting watching the clouds as they touch my nose And everythings unnatural, for a momentHigh above, Too far away to hear me crying If I forget this love I dont have to think of why Im dyingLying down watching T.V. I get so numb From all those stupid shows that just seem to wear me down Listening to the droning beats of the radio My mind has drifted somewhere else, I dont even knowHigh above, Too far away to hear me crying If I forget this love I dont have to think of why Im dying You know Im dying too You know Im dying too You see I made a chain reaction, yeah Of multiple distractions You see I made a chain reaction, yeahHigh above, Too far away to hear me crying If I forget this love I dont have to think of why Im dying
