

# All You Good Good People

## Embrace

I feel like I meant something  
You always say, you need more time  
Well, I'll stay right here  
And I'll wait for good until I find a love worth mine  
Someday, you've got it coming  
It hurts me when I read the signs  
So loud and clear, that I'll make you glad  
If I'm leaving first and crying  
All you good good people listen to me  
You're just about done with the way that you feel  
'Cause nothing rings home enough to dig your heels in  
You don't have to leave me to see what I mean  
All you good good people listen to me  
And all I wanna do is find my name upon the line  
Before I have to lose this I want time  
All you good good people listen to me  
You're just about done with the way that you feel  
'Cause nothing rings home enough to dig your heels in  
You don't have to leave me to see what I mean  
Lose all your fears, they are keeping you down  
You won't have to fake it, while I'm around  
All you good good people listen to me
